Introduction

The Municipal Top provides a detailed analysis of the economic tissue in which your company evolves.

In the first part of the report, we provide not only a geographical analysis, we will also answer the following questions:

- What is the profile of the companies located in your postal code?
- What differences are revealed in comparison to the district, the province or the whole of Belgium?
- How well does your municipality score compared to the larger local entities with regard to the major key figures and ratios?
- Who are the largest players if we look at turnover, added value or cash flow, who report the largest profits or the largest investments, who are the major employers, etc.?
- What companies did we label a 'Gazelle' for their remarkable growth?

In the second part, we provide an insight into the top 10 companies in your postal code, accompanied by the major key figures and sector medians in one single chart. Each individual analysis is completed with relevant company information which, in addition to the basic information (address, phone number, e-mail, website, etc.) also contains the names, positions and e-mail addresses of the main executives along with an overview of parent and affiliated companies.

The rankings and figures in this report are based on the balance sheets of all companies required to file annual statements published online by Trends Top.

Basic data

Basic data: Retie (2470) - Number of companies: 1,373								
	Municipality		Regional indexes					
	Total	Per company	District	Index	Province	Index	Belgium	Index
Turnover – Trends Top *	161,104,930	117,338	797,589	15	944,232	12	662,152	18
Added value	75,458,938	54,959	244,372	22	232,467	24	176,151	31
Profit (+), loss (-)	12,856,102	9,364	51,078	18	99,462	9	48,002	20
Investments	23,656,650	17,230	48,197	36	61,973	28	43,828	39
Work force	708.90	0.52	1.64	31	1.89	27	1.67	31

This is not always the turnover as published on balance sheet – [More information](#).

Amounts in euro - number of employees in full-time equivalents (FTE) and according to social balance sheet.

The indexes show the average company result of the municipality compared to the company averages of the district, the province and the whole of Belgium.

Geographical

In the next pages we take a look at the geographical dispersion from four different angles:

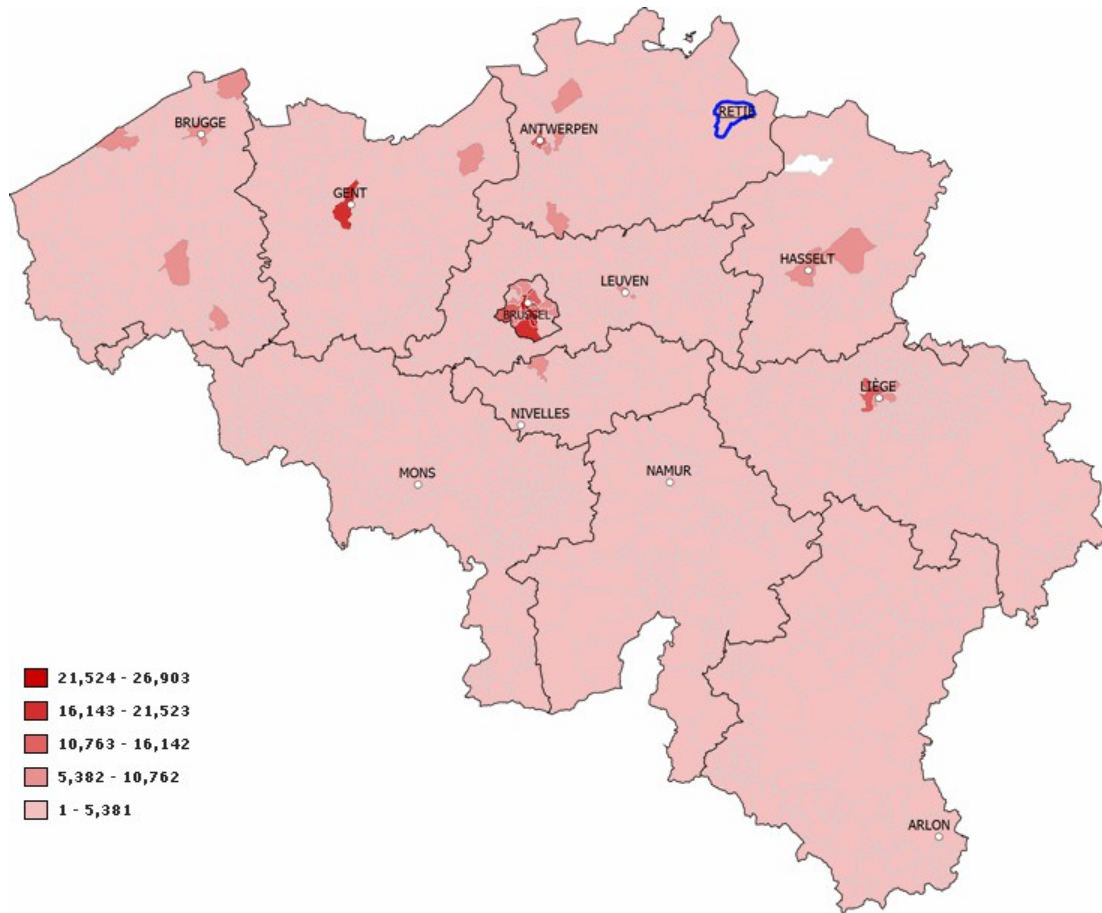

- On a national level by province
- Specifically for the province where the municipality is located
- On a national level by district
- Specifically for the district where the municipality is located

For each province, district or municipality we provide absolute figures, percentages and averages for the number of companies in the wider region, the cumulated turnover*, the number of employees and the added value.

This will not only allow an easier estimation of the municipality's regional economic importance, it will also show what role the district or province plays at a national level.

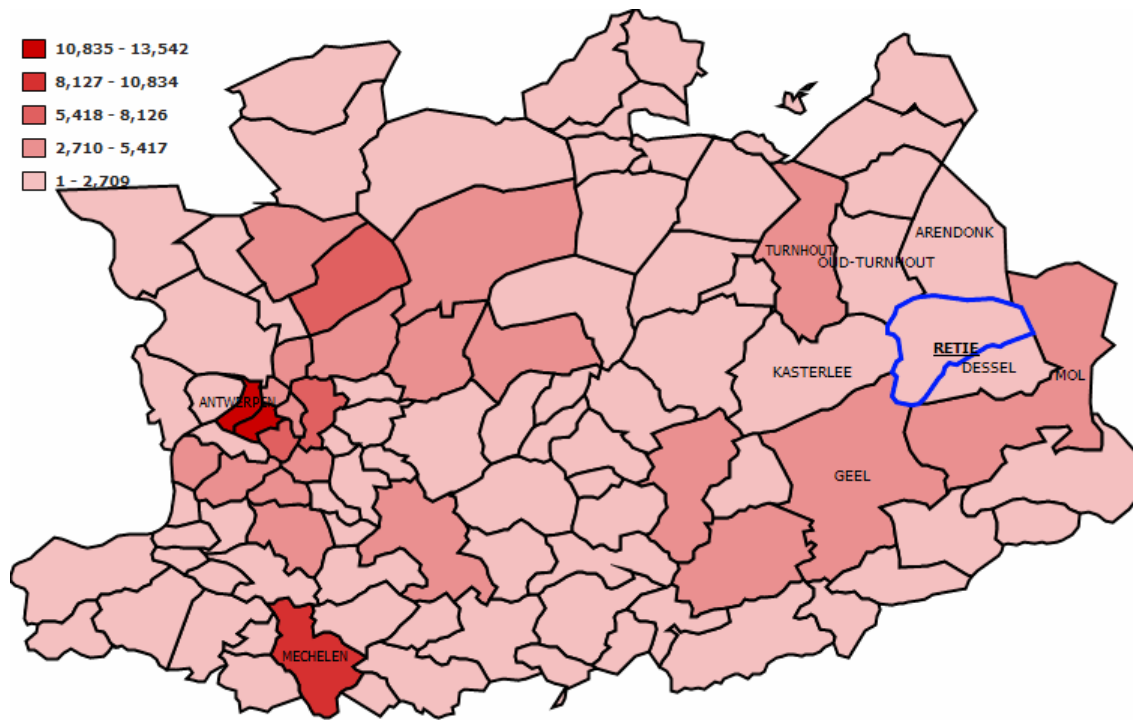

This is not always the turnover as published on balance sheet – More information at trendstop.be/ranking.

Analysis

Our detailed analysis provides an insight into the company profile of your municipality's businesses based on the parameters Activity (sector), Turnover*, Added Value, Number of Employees, Establishment Date and Score or Overall Health Indicator.

Each parameter is subdivided into different categories allowing you, for example, to get an instant overview of the number of local companies active in the transportation sector, that achieve a turnover of more than one million euro, or employ less than 10 people.

By means of an index we compare the municipality successively to the whole of Belgium, to the province and to the district, for each given parameter and category. An index larger than 100 means the municipality is over-represented for that specific category, whereas an index smaller than 100 means under-representation.

The column 'Share' shows for each category the percentage of companies established within the municipality, as a proportion of the overall population in that category for the whole of Belgium, the province or the district. In other words, it gives an indication of their economic specific gravity.

This is not always the turnover as published on balance sheet – More information at trendstop.be/ranking.

Retie vs. Belgium

The score is a way of sorting companies on a scale according to their risk of defaulting. The higher the risk, the lower the score, but it is just about the probability, it is never a foregone conclusion.

Benchmark

In the next pages we compare the municipality's major key figures and ratios as to solvency, liquidity and profitability to those of the province and the whole of Belgium.

For each of those key figures we compare the municipality's respective median values to those of the province and Belgium.

The result of each comparison is an index. An index above 100 means the municipality's figure exceeds the wider region's, whereas an index below 100 indicates the opposite.

In order to reflect the overall evolution, we provide the same statistics for the last five financial years.

For more info on the ratios' interpretation or calculation, please take a look at www.trendstop.knack.be/en/figures.aspx

Financial year 2018

Top 50 by...

Trends Top would not be Trends Top if this report did not contain traditional rankings.

We therefore list the Top 50 companies based on:

- Turnover*
- Profit
- Added Value
- Investments
- Cash flow
- Number of employees (in FTE)

In addition to the key figures of the last two financial years, we calculate the difference and indicate whether this is an ascending or descending trend.

This is not always the turnover as published on balance sheet – More information at trends.top.be/ranking.

Gazelles

Annually, the fastest-growing companies of each province are elected 'Gazelle' by Trends Magazine.

This growth is calculated based on the evolution in terms of turnover, cash-flow and workforce, both in absolute figures as in percentages, for five consecutive years.

The overview below lists the province's Gazelles, along with turnover, cash-flow and workforce figures for the latest financial year.

Gazelles in district Turnhout: 49

Gazelles in municipality Retie (2470): 0

	Company	Municipality	Turnover – Trends Top	Cashflow	Staff

The highlighted companies are based in the district in which the municipality is located.

(*) If the company's turnover is not available, the gross margin is taken into account. For smaller businesses with a condensed balance sheet publication of turnover figures in their annual accounts is not mandatory.

Individual company profiles

The analysis will contain elaborate business information on the 10 major companies in the municipality.

- contact data
- company activities
- rankings
- score or general health indicator
- management
- mother/daughter companies
- crucial financial key figures for 5 fiscal years with sector benchmarks

On trendstop.be the above detailed information is available for all companies.
